

Welcome to Math 163. The course syllabus is here: [math163_syllabus-1.pdf](#)

Office hours (Fridays at 3:30pm ET) link: <https://harvard.zoom.us/j/94372271231>

Contact information:

- Elden Elmanto: elmanto@math.harvard.edu
- Forrest Flesher: forrestflesher@college.harvard.edu

The official course text is "Methods of Homological Algebra" by Gelfand and Manin. It is available through Harvard's Springer access here: [Methods of Homological Algebra](#). Also useful is [An Introduction to Homological Algebra](#) by Weibel, and [Commutative Algebra with a View Toward Algebraic Geometry](#) by Eisenbud.

Students are all required to present at least two lectures. The sign up for the first 3 weeks is here: <https://forms.gle/pGjZpa92skRL3mWF9>

We'll let you know if you're assigned to present for a given week as soon as possible. Please meet with Forrest to go over your prepared lecture at least one day before your presentation. Aim for lectures to be ~1 hour to leave time for questions.
