Statement of Interest and Qualifications

Unfortunately, we expect this course will be oversubscribed and we must prioritize who can attend. As such, we will prioritize graduate students with relevant research interests, but are open to other qualified and interested candidates. As an advanced course where we will discuss recent literature at a technical level, we do expect significant math, statistics and machine learning background. We ask students prepare a one paragraph statement indicating their relevant background (courses taken, etc.) and their level of interest in the course (if we open a slot, will you take it?). **Please submit this by 5pm on Friday, Feb 1 using Piazza.**
